Installation Guide – Smart Frequently Bought Together & UpSells

Requirements

- An active BigCommerce store
- Permission to install apps from the BigCommerce control panel
- At least one published product for testing bundles

Installation Steps

1. Log in to your BigCommerce Control Panel.
2. Navigate to Apps → Marketplace.
3. Search for Smart Frequently Bought Together & UpSells.
4. Click Install.
5. Review and approve the requested permissions.
6. Open the app from Apps → My Apps.

Initial Setup

1. Open the app dashboard after installation.
2. Create your first Frequently Bought Together bundle:
   - By Product (SKU) or By Category
   - Add products and set a bundle name
3. Go to Settings and configure:
   - Widget position (before or after product description)
   - Maximum number of bundles displayed in the slider
4. Save your settings.

Verify Installation

1. Open a product page on your storefront.
2. Confirm the Frequently Bought Together widget is visible.
3. Test adding multiple products to the cart using the widget.

Optional – Pro Plan

- Enable Automatic Bundle Generation based on order history (up to 12 months).
- Apply bundle discounts to increase conversion and average order value.

Notes

The app does not modify checkout behavior or process payments directly.
